# SELECTIVE PALLET RACKING

Universal Racking System for Storing Multiple Pallets

This system offers the most economical, efficient storing and retrieval of pallets. It provides easy direct access to every pallet in storage and being available in an extensive range of sizes it is extremely versatile. This is why our Selective Racking System has been and still is the most popular choice for the past 10 years.

## Features

- Individual access to all pallets to full height of warehouse.
- Simple stock rotation achieved.
- Easy beam adjustment accommodates variable pallet heights.
- Compatible with many handling equipment styles.
- Conventional tolerance for floors when used to 10m high.
- Lower level pallets can be located on the floor (picking pallets).
- Accessories available can accommodate every unit load type.
- Economical shelving beams can be added for low level picking.
- High average locations used 95%, for 100% accessibility, good stock rotation.

## Selective Racking System Concept

Average Locations Used	95%
Immediate Accessibility	100%
Stock Rotation	Very Good
Floor Utilisation	40%

## Applications

- Palletised Goods
- Carpet Storage
- Tyre Racks
- Archive Storage
- High rise Shelving

The Unirack Range of Pallet Racking is our latest and most popular range of racking. It was specifically designed & manufactured for us. In times where the market is flooded with low quality products and inconsistent racking, we made it our priority to deliver the service our customers need and offer premium quality as well as maintain consistent high standards for 20 years now. We invite you to take a look at our products and you will see the difference.

## Unirack Range: Key Features

- Safety locking system that locks together
- Compatible with a number of existing systems
- Extra strong galvanised uprights
- Powdercoated beams with 5 hook connectors
- Various lengths, widths, heights available
- Heavy duty wrap around base plates with quality welds

## Unirack Range Beam

Powdercoated beams with 5 hook connectors

The Unidex range is our original and oldest range of Selective Pallet Racking, having stocked and sold it for 10 years. Over that time, we have fitted out supply warehouses, manufacturing facilities, retail centres, and other storage and distribution facilities with this range. Hence, we are confident that it lasts. The design has not changed since, so if you are looking at adding to an existing system, it will very likely match this range.

## Unidex Range: Key Features

- Safety locking system that locks together
- Easy to assemble and modify as required
- Long lasting galvanised uprights
- Powder coated beams with 4 hook connectors
- Various lengths, widths, heights available
- Heavy duty base plates

## Unidex Range Beam

Powdercoated beams with 4 hook connectors

# MEZZANINE FLOORS & RAISED STORAGE AREAS

Maximise Warehouse Space with Mezzanine Floors

Mezzanine floors systems are a cost-effective way to maximise floor space and improve productivity in warehouse and factory environments.

At Unirack, we have three types of mezzanine variations: Racking, Longspan and Structural Steel Mezzanine Floors.

## Racking Mezzanine Floor System

Rack-based mezzanines can be multi-tiered, doubling or tripling the available surface area

## Longspan Mezzanine System

A cost-effective and flexible storage solution for those looking to maximise storage density

## Structural Mezzanine System

Structural mezzanine floors are a heavy-duty solution constructed from structural steel posts and beams

## Mezzanine Floors System Concept

Average Locations Used	90%
Immediate Accessibility	40%
Stock Rotation	Average
Floor Utilisation	60%

## Applications

- Parts Storage & Picking
- Instant Workshop
- Vehicle Storage
- Office/Retail Area
- Archive Storage

# DRIVE-IN RACKING

Ideal For High Density Pallet Storage

Are your pallets evenly packed & stored? Do you need to maximise space? Do you have high-volume? Then give us a call and let us explain why Drive-In racking systems are more and more popular. With unique self-centring rails position pallets quickly, easily and safely. Works with conventional forklifts and perfect for maximising areas such as cool rooms.

## Drive-In Racking System Concept

Average Locations Used	70%
Immediate Accessibility	75%
Stock Rotation	Average
Floor Utilisation	80%

## Applications

- Food & Beverage Facilities
- Cold Storage Facilities
- High Density Pallet Storage

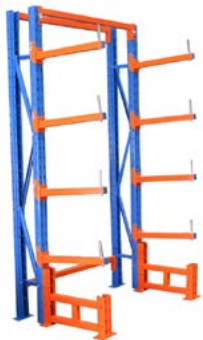

# CANTILEVER RACKING

Perfect Solution For Storing Heavy Long Packs Such As Lengths Of Timber

Cantilever Racking is used for storage of very long items such as carpet, timber, pipe, etc. It is open and therefore easier to place and remove stock.

## Light Duty Cantilever

Light Duty Cantilever comes standard as 2500mm high & 1200mm wide but can be configured to 3600mm & 4800mm in height as well as 1800mm in width. Any questions please call your local branch.

## Medium Duty Cantilever

Medium Duty Cantilever comes standard as 3600mm and 4800mm high & 1200mm wide but can be configured upto 6000mm in height as well as 1500mm in width. Any questions please call your local branch.

## Cantilever Racking System Concept

Average Locations Used	90%
Immediate Accessibility	50%
Stock Rotation	Average
Floor Utilisation	60%

## Applications

- Fabrication Facilities
- Steel Merchant Facilities
- Automotive Facilities
- Garden Supply Facilities
- Hardware Supply Facilities
- Timber Merchant Facilities
- Furniture Supply Facilities
- Plumbing Supply Facilities
